##### 1. Problem Statement

You are taking part in a coding challenge where your task is to design a program that conjures a mesmerizing numerical pyramid pattern. The enchanting pattern is fashioned using a for loop and is customized based on user input.

Participants are prompted to unveil the pyramid's magic by specifying its height - essentially dictating the number of rows in this spellbinding creation.

Write a program that employs to weave this captivating numerical pyramid as shown below.

Example

Input:

4

Output:

### ***Input Format***

The input consists of a positive integer n representing the number of rows in the pattern.

### ***Output Format***

The output prints the required pyramid pattern, as shown in the sample output.

import java.util.Scanner;
public class Main{
    public static void main(String[] args){
        Scanner n= new Scanner(System.in);
        int n1=n.nextInt();
        for (int i=1;i<=n1;i++){
            for(int s=1;s<=n1-i;s++){
                System.out.print(" ");
            }
            for(int j=1;j<=(2*i-1);j++){
                System.out.print(j);
            }
            System.out.println(" ");
